Mr. Douglas Halsall
Chairman
Advanced Integrated Systems Ltd.
12-14 Oxford Terrace
Kingston 5.

Dear *Doug*,

I am pleased to learn that Advanced Integrated Systems (AIS) is spreading its wings across the Caribbean and positioning itself to be a significant regional player.

You know how impressed I have been with the growth of the company from its inception and I am privileged to have been there when it all started and to have watched it grow into the information systems powerhouse that it has become.

Much of the success of AIS is due to vision you offered, the confidence you had in yourself and the team which you assembled around you and the inspiring leadership you offered to them. It is a testament to our ability to break new ground and conquer new frontiers and place ourselves among the best of the best.

The CSME poses challenges in as much as it offers a pathway to exciting new opportunities. I am confident that AIS under your leadership will engage those challenges and seize those opportunities. It will constitute one more building block towards a powerful and prosperous Caribbean.

Yours sincerely,

Bruce Golding
