I confirm that Advance Integrated System Ltd has and continues to provide Life of Jamaica with online access to Electronic Data Interchange services for submission and adjudication of health claims since January 2005.

This service has been a major factor in improving the efficiency of our claims process. We are quite pleased with the performance of the AIS Team as they continue to make significant efforts to not only meet the specific commitments under the contract but also provide support as required in the dynamic business of health claim processing.

I confidently recommend Advance Integrated System as a solid and reliable supplier, and experts in their field.

Yours faithfully
