Trinidad

Attention: Mr. Kevin Giffard

Dear Sir:

Advanced Integrated Systems Company Limited

I have been requested by the Chairman & CEO of AIS, Mr. Douglas Halsall O.D., to write a recommendation for the company.

AIS was founded and is owned by Mr. Halsall whom I have personally known for over forty years. Doug was honoured by the Government of Jamaica for his contribution to technology after a long and distinguished career in the field of computer science. After a sterling career with NCR, at the time a leading international company based in the USofA, he started AIS which is today a leading firm in the development and provision of technological equipment, service and software systems.

The National Health Fund is heavily based on technology and the first contract signed was with AIS for the provision of Transaction Processing services. AIS won this contract in an open international tender on the basis of a clear differentiation in the experience and level of service offered. Since 2003, they have proven themselves to be a critically important strategic partner in the improvement of service quality and the development of new services.

AIS has been a significant contributor to our successes in the implementation and operation of the NHF thus far and I have no hesitation in recommending them as a reliable and supportive service provider.

Yours sincerely,

.....
Raphael D. Barrett
Chief Executive Officer
