TO WHOM IT MAY CONCERN,

ADVANCED INTEGRATED SYSTEMS LIMITED (AIS) and Prospective Health Inc. - [www.relayhealth.com](http://www.relayhealth.com), have been associates in the Online Adjudication of Health Insurance Claims for some seven years. During this period, we have delivered a product which, though simple to administer, addresses the most complex Plans and Benefits. Plan set-up is through a simple parameter driven methodology and the application employs the most contemporary design techniques. The user interface for the various Providers types is intuitive, resulting in a short learning curve.

The System has been live in Jamaica for over six years and consequently its robustness and richness in features that provides our users with great competitive advantages are without question. AIS maintains a staff of experts, capable of giving premium customer service. Nonetheless, the resources of McKesson stand behind AIS to address all reasonable requests promptly and reliably.

Regards,

Brian Pavlik
